

Android WPA2 連線設定步驟

例：hTC New One

Step 1：開啟無線網路，選擇“ NPTU-WPA2”

Step 2 :

EAP : PEAP / 階段 2 驗證 : GTC

識別 / 密碼 : email 帳密

The screenshot shows the Wi-Fi settings for a network named "NPTU-WPA2". The security protocol is set to "802.1x EAP". Under "EAP 方法" (EAP Method), "PEAP" is selected. Under "階段 2 驗證" (Phase 2 Authentication), "GTC" is selected. There are two input fields: "識別" (Identity) and "密碼" (Password), both of which are currently empty. Below the password field is a checkbox labeled "顯示密碼" (Show Password), which is unchecked. At the bottom of the dialog are two buttons: "取消" (Cancel) and "連線" (Connect). The status bar at the top shows the time as 4:59 PM and battery at 39%. At the bottom of the screen, the network name "DSL-6641K" and the security note "透過 WPA 加密保護" (Protected with WPA encryption) are visible.

連線成功。
